# 1. Introduction

EnerCharge's DC product line (EC500, ECC320, DCW Wallbox and DC BusPillar) is an innovative and future-proof solution for the public and industrial charging sector.

**The DC Product line by EnerCharge (EC500 ECC320, DCW Wallbox and DC BusPillar)** is supplied pre-configured. For the installation procedure, refer to the "Transport, Installation and Start-Up" manual. The operating instructions also provide important information on operation.

This user manual describes the web interface of the DC Product Line and provides information about all functions of the web interface that are available for

the configuration of the EC500, ECC320, DCW Wallbox and DC BusPillar products.

EnerCharge products are permanently developed further and fulfill all European-wide valid regulations and standards for the charging operation of E-vehicles according to the standard IEC 61851-1, Mode 4.

Visit our website at [www.enercharge.at](http://www.enercharge.at)

## 1.1 Structure of this Manual

- > **General:**  
Contains general information about the operating instructions of the web interface.
- > **Safety:**  
Contains information on the presentation of safety instructions.
- > **Operation:**  
Contains all information about the operation of the web interface.
- > **Layout and Functions:**  
Contains all information about the structure and functions of the web interface. In this section, for example, the adjustment of parameters or the adjustment of the pricing models are explained in detail.
- > **Attachments:**  
Includes information on customer service and legal notice.

## 2. General

This document contains all important information for operating the web interface of the DC charging systems via web browser. It is an original part of the complete product provided by the manufacturer and serves as an aid for the operation and configuration of the product.

**This manual is an** essential operating aid for operating and setting the web interface. This is done via a web browser and the web interface is identical for all models of the DC Product Line - EC500, ECC320, DCW Wallbox and DC BusPillar.

### Read this manual carefully before you start operating the web interface.

This manual will help you to:

- > operate the service tool,
- > change or set important functions and parameters,
- > administrate the pricing models, invoice information and loyalty cards,
- > change the layout and lighting,
- > identify status and error codes.

These operating instructions are only intended to provide assistance for the web interface. For information on the installation and startup of the charging system, please refer to the "Transport, Installation and Start-Up" and "Operating" manuals.

Keep this operating manual for later use and pass on all documents if the charging station is used by other persons. Any use that deviates from this operating manual is not permitted and will result in the exclusion of warranty, guarantee and liability.

All notes that are important for the safety of the user are marked with a corresponding symbol. This is important information which, if ignored, may cause health consequences for the user and damage to the charging station, the vehicle or the building.

The following symbols are important to note when reading this manual:

Symbol	Explanation
	Requirement: Indicates a requirement that must be met, before the next action can be performed.
	Action step: Indicates a single action step.
	Sequence of action: Indicates a sequence of action steps, that must be executed in sequence.
	Result: Indicates the result of an action.
 <b>INFORMATION</b>	Information: Indicates information for special attention.

## 2.1 Safety Symbols

**Please take note of the following safety symbols:**

 **DANGER** **Nature, Source**

This symbol in conjunction with the signal word "Danger" signifies an immediate danger. Disregarding this safety notice can lead to serious injury or death.

- *This is a warning text with a known remedial action*

 **WARNING** **Nature, Source**

This symbol in conjunction with the signal word "Warning" signifies a possibly dangerous situation. Disregarding this safety notice can lead to serious injury or death.

- *This is a warning text with a known remedial action*

 **CAUTION** **Nature, Source**

This symbol in conjunction with the signal word "Careful!" signifies a possibly dangerous situation. Disregarding this safety notice can lead to minor or slight injuries.

- *This is a warning text with a known remedial action*

 **ATTENTION**

Passages marked with this symbol contain important notices or particular information necessary for successful operation. Actions marked with this symbol should be carried out as required.

## 3. Operation of the Web Service Tool

### 3.1 Web Service Tool Controls

#### **! ATTENTION**

Information on how to integrate the charging system into a LAN or WAN network can be found in the respective "Transport, Installation and Start-up" manual for the charging station in question.

The **graphical web interface** allows the charging system to be adjusted via a web browser from a computer, smartphone or other web-enabled interface. The following functions can be adjusted:

- > Display of the current status of charge points and statistical evaluation of charging processes: daily or monthly evaluation by payment methods, turnover, energy.
- > Display of the read-in loyalty cards (RFID/NFC) and updating of the loyalty cards.
- > Adjustment of charging system parameters, such as visualization, lighting and notifications.
- > Adjustment of the pricing model and tariffs of the active charge points.
- > Retrieve specific device information on payment, maintenance and logging.

### 3.2 Default User Data

**You can log in** for the first time with the default user data.

Important: Change the user data immediately (see [„3.6 Changing Your Log-in Information“ on page 11](#)):

#### **👉 INFORMATION**

When logging in as "User", the functions of the web interface are only available to a limited extent. Settings can only be adjusted to a reduced extent. The operating instructions show the possibilities when logged in as "Operator".

> **Log-in Data Operator:**

User: operator@enercharge.at

> Password: !0P15944ksdkl

> **Login-in Data User:**

User: user@enercharge.at

Password: !Us75676dkJkd

## 3.3 Remote Access to Charging Station

**For remote access** to the charging station, EnerCharge offers three connection types for the customer to choose from.

The following connection types are available:

1. Access via internal network (internal IP address): Remote access from external IPs is not possible with this connection type.

Example: <https://192.168.100.101:8000>

2. Access via public IP address:  
This connection type requires a public IP address for the Internet connection. Monthly costs are incurred via the provider (e.g. t-mobile).  
Note: A public IP address can only be requested via the provider and not via EnerCharge.

Example: <https://80.120.233.84:8000>

3. Access via web-direct link:  
This requires no public IP address. Remote access is via a web-direct link provided by EnerCharge. There is an annual subscription cost for this optional service.

Note: If a web direct link is desired, contact EnerCharge Support.

Example: <https://v0014987-6500.prj3774-mpn.mdex.de/>

## 3.4 Opening the Web Service Tool

**Access the web interface** by entering an IP address directly in the web browser. Keep the IP address safe and only share this information with people who are authorized to access the web interface.

To open the web interface in the browser please note the following action steps:

### ! ATTENTION

EnerCharge recommends using the "Microsoft Edge or Mozilla FireFox" browsers. For information about installing a web browser on a computer or other interface, refer to the browser provider's installation instructions.

### ! ATTENTION

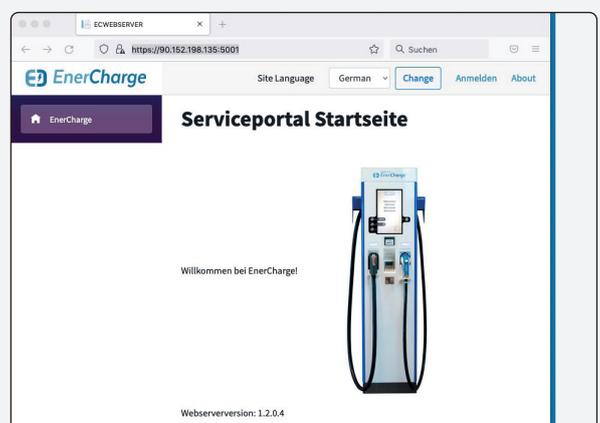

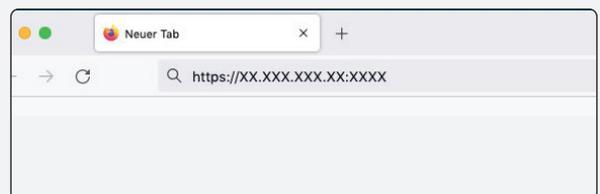

The IP address depends on the type of remote access. Please see: [„3.3 Remote Access to Charging Station“ on page 8](#).

#### Action steps: Open the Service Tool

- ✓ The charging system and the computer/smartphone/interface are connected to the Internet.
  - 1 Make a note of the IP address of your charging system:  
e.g.: `https://XX.XXX.XXX.XXX:5001`
  - 2 Open a web browser on your computer/smartphone/interface and enter the IP address from step 1 in the browser's address bar (see image on the right).
- INFORMATION**  
Accept the certificate when you open the web interface for the first time.
- ✓ The web interface of the charging system opens.

### ! INFORMATION

The IP address depends on the type of remote access. See: [„3.3 Remote Access to Charging Station“ on page 8](#)

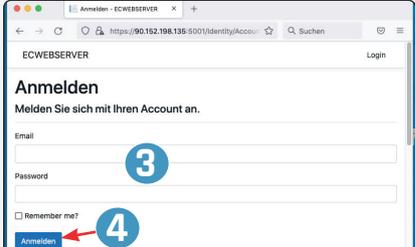

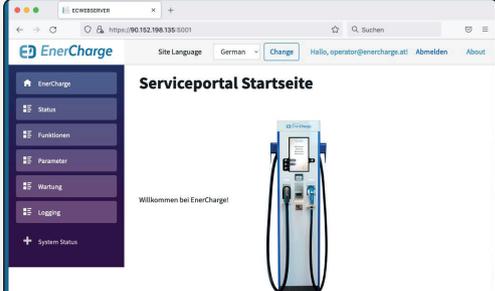

## 3.5 Logging into the Web Service Tool

**The start page** The start page of the Service Tool web interface provides information on the "Status", "Functions", "Parameters", "Maintenance" and "Logging" of the DC charging system. The start page is primarily used for an overview. Changes can be made after „**Login**“. Observe the following steps when "Logging in":

### ! ATTENTION

The user data for the first login can be found in this documentation. Change this user data after the first login. Make a note of the new user data for later use. See also: „[3.6 Changing Your Log-in Information](#)“ on page 11.

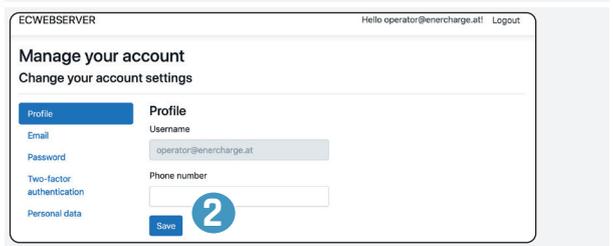

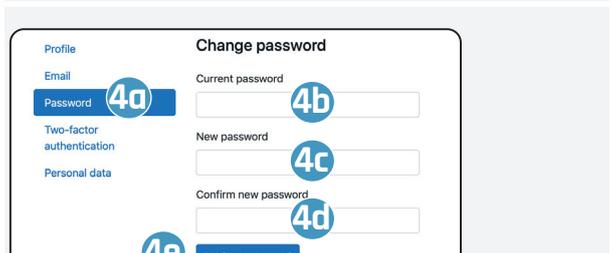

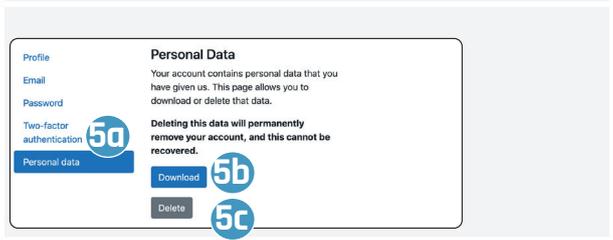

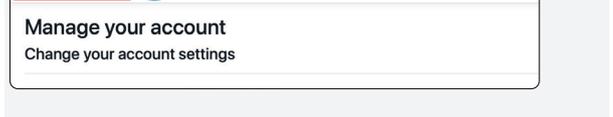

#### Action steps: Open the Start Page

✓	The web interface is open: see <a href="#">3.4</a> .	
1	Click the <b>1</b> tab and select the desired language. Then click the button „ <b>Change</b> “.	
✓	The desired language is set.	
2	Klick the „ <b>Sign in</b> “ button <b>2</b> on the top right side of the start page.	
✓	The sign-in window opens.	
3	Log in with your access data (see <a href="#">3.2</a> ). The access data can also be found in the documents you received when you purchased the charging station.	
4	Click the <b>4</b> „ <b>Sign in</b> “ button.	
✓	The start page is open.	
▶	To log out, click the <b>5</b> „ <b>Sign out</b> “ button.	

## 3.6 Changing Your Log-in Information

After the first log-in, the user name and password should be changed immediately.  
To do this, follow the action steps below:

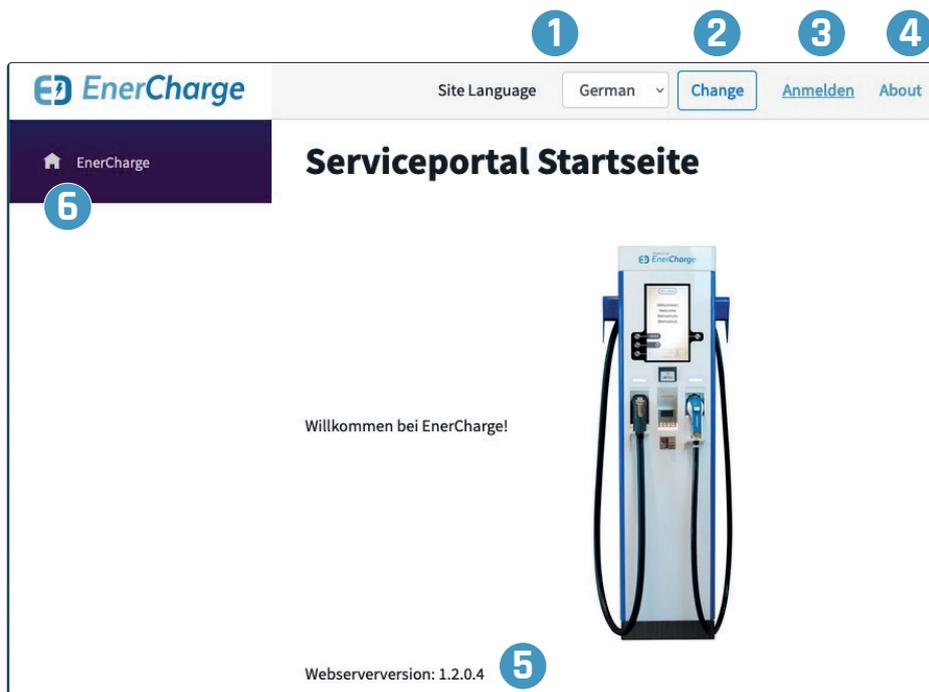

### Action Steps: Changing the Log-in Information

✓	You have successfully logged in: see <a href="#">3.5</a> .	
1	Click on "Hello, XXX@XXX.at" (Log-In Username) <b>1</b> .	
2	The window "Manage your account" opens.  Enter the desired phone number and click the button <b>2</b> „Save“.	
3	Click on the menu item <b>3a</b> „Email“ on the left.  Enter the desired email address and click the button <b>3b</b> „Change email“.	
✓	The email address has been successfully changed.	
4	Click the menu item <b>4a</b> „Password“ on the left. <b>4b</b> Enter your current password in the "Current password" field. <b>4c</b> Enter your new password in the "New password" field. <b>4d</b> Enter your new password in the "Confirm new password" field. Click the button <b>4e</b> „Update password“.	
✓	The password has been successfully changed.	
5	Click on the menu item <b>5a</b> „Personal data“. <b>5b</b> Click on „Download“ to download your personal data. <b>5c</b> Click on „Delete“ to delete your personal data.	
6	Click on the menu item <b>6</b> „ECWEBSERVER“ on the top left.	
✓	The start page opens.	

## 4. Layout and Functions of the Web Service Tool

This section provides an overview of the structure and functions of the web interface. The menus and the individual functions are explained in the following sections of this operating manual.

### 4.1 Start Page

- 1 Site Language**  
 By clicking on the tab, the language of the service portal is selected. To confirm, click on „**Change**“.
- 2 Change**  
 Confirmation of the selected language for the service portal.
- 3 Sign in / Sign out**  
 Logging in and logging out as a user on the service portal. Bei Clicking on „**Sign in**“ opens the sign-in window.
- 4 About**  
 Link to the EnerCharge website: „**www.enercharge.at**“.
- 5 Webserver version**  
 Information on the current version of the web server: „**X.X.X.X**“.

#### Sign-in Window

The screenshot shows the 'Anmelden' (Sign in) window. It has a title bar with 'Anmelden - ECWEBSERVER' and a browser address bar showing 'https://90.152.198.135:8001/Identity/Account'. The form contains the following fields and elements:

- ECWEBSERVER Login
- Anmelden
- Melden Sie sich mit Ihrem Account an.
- Email:
- Password:
- Remember me?
- Anmelden button

## 4.2 Menu

The **extended menu of the start page** provides information on the available functions. The submenus open by clicking on the individual menu items in the left area of the start page. The advanced menu provides access to the advanced settings areas of the charging system.

### INFORMATION

As a customer/operator, you can make individual settings at "Status", "Functions" and "Parameters". The menu items "Maintenance" and "Logging" are for information only.

- 6 EnerCharge**  
Home-Button: Access the start page
- 7 Status**  
Displays information about the charge points:  
E.g. turnover, availability and current charging power.
- 8 Functions**  
Customer card management: shows all currently scanned customer cards (RFID/NFC).
- 9 Parameters**  
Display and adjust all basic settings such as station name, address, serial number, payment settings, LED settings, billing email and OCPP settings.
- 10 Maintenance**  
Shows the current software version, any error messages and the status of the charging station or EC controller. It also shows whether an update is available.
- 11 Logging**  
Display of the system log data with date, time, command and description.

## 4.3 Status

The "Status" menu item shows the following information and allows the following functions:

1 See section: [4.3.1 on page 14](#)

2 See section: [4.3.2 on page 15](#)

### 4.3.1 Live Charging View

Shows live data of the active charge points 1 and 2:

- > Type: DC (*DC = direct current*)
- > Status: *available / not available*
- > Current power output: 0 kW (e.g. *50 kW = 50 kilowatts of charging power*)
- > Click button 1 „Details“ for extended information on the desired charge point.
- > Click button 2 „Minimize“ to hide the extended information.

#### 4.3.1.1 Charging View Screen

### 4.3.2 Analysis

**Enables the** monthly or daily display of statistical evaluations according to turnover (Euro) and energy (kWh). In addition, the individual payment methods are displayed.

#### Action steps: Display and Download of Evaluations

<p>✓</p>	<p>The extended "Status" menu is open.</p>	
<p>1</p>	<p>Click on the menu item „Analysis“.</p>	
<p>2</p>	<p>Click on „Day“ or „Month“ to select the desired evaluation time frame.</p>	
<p>3</p>	<p>Click on the „Calendar“ symbol to select a date.</p>	
<p>4</p>	<p>Click „Search“ to show the corresponding evaluation.</p>	
<p>✓</p>	<p>The selected evaluation is displayed. Find the information in the tables and graphs displayed.</p> <p>In the lower area there is a table of all charging processes of the selected period with detailed information such as amount of energy, charging time, parking time, tariff, payment method, etc.</p>	
<p>5</p>	<p>Click on „Download“ to save the invoice information for the selected time period on your device (computer/smartphone/interface).</p>	
<p>6</p>	<p>In the pop-up window, select „Save File“ and click on „OK“.</p>	
<p>✓</p>	<p>The table with the invoice information is saved locally as a CSV file and can be edited with "Microsoft Excel", for example.</p>	

## 4.4 Functions

The "Functions" menu item provides information on customer cards and enables the management of customer cards (RFID/NFC). These can be easily added, edited or removed.

1 See section: [4.4.1 on page 16](#)

### 4.4.1 Card Management

#### 4.4.1.1 Updating/Deleting Loyalty Cards

##### Action Steps: Adjust/Delete Loyalty Cards

✓	The extended "Functions" menu is open.	
1	Click on the menu item „Card Management“.	
2	To change customer cards click in the desired field in the desired line.  Select existing text and enter new text.	
3	Scroll the display window to the right side to view or change all data windows.	
4	To confirm your changes, click on the „Change“ button for the corresponding line.	
5	To delete a card, click on the „Delete“ button for the corresponding line.	
✓	Loyalty cards successfully changed/deleted.	

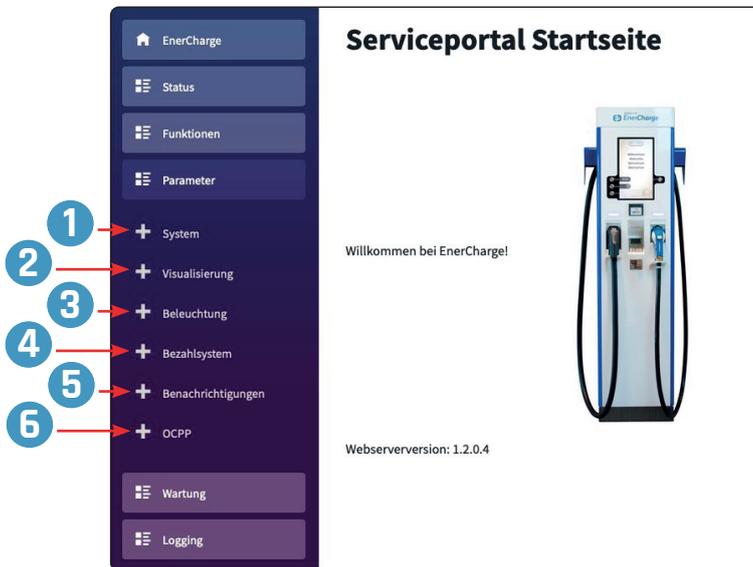

### 4.4.1.2 Add a New Loyalty Card

**Action Steps: Adding new Loyalty Cards**

	The extended "Functions" menu is open.																																																																																																																																													
1	Click on the menu item „ <b>Card Management</b> “.	<div style="border: 1px solid black; padding: 5px;"> <p><b>Kundenkarten</b></p> <table border="1" style="width: 100%; border-collapse: collapse; font-size: 8px;"> <thead> <tr> <th>ID</th> <th>Kundennummer</th> <th>Kundennummer 2</th> <th>Firma</th> <th>Vorname</th> <th>Nachname</th> </tr> </thead> <tbody> <tr><td>1</td><td>1000</td><td>A&amp;E NAT</td><td>A&amp;E Naturstrom Vertrieb Gm</td><td>Wilfried</td><td>Klaus jun</td></tr> <tr><td>2</td><td>1001</td><td>A&amp;E NAT</td><td>A&amp;E Naturstrom Vertrieb Gm</td><td>Philipp</td><td>Forstner</td></tr> <tr><td>3</td><td>1002</td><td>A&amp;E WAS</td><td>A&amp;E Wasserkraft GmbH</td><td>Einsatz</td><td>Fahrzeug</td></tr> <tr><td>4</td><td>1003</td><td>ENC</td><td>EnerCharge GmbH</td><td>Roland</td><td>Klaus</td></tr> <tr><td>5</td><td>1004</td><td>ENC</td><td>EnerCharge GmbH</td><td>Manuel</td><td>Wilhelmer</td></tr> <tr><td>6</td><td>1005</td><td>ENC</td><td>EnerCharge GmbH</td><td>Jens</td><td>Winkler</td></tr> <tr><td>7</td><td>1006</td><td>ENC</td><td>EnerCharge GmbH</td><td>Software</td><td>Test</td></tr> </tbody> </table> <p style="margin-top: 5px;">Eingelene RFID/NFC Karten</p> <div style="border: 1px solid black; padding: 2px; display: inline-block; font-size: 8px;">Aktualisieren</div> <span style="font-size: 24px; color: blue; font-weight: bold; margin-left: 10px;">2</span> </div>	ID	Kundennummer	Kundennummer 2	Firma	Vorname	Nachname	1	1000	A&E NAT	A&E Naturstrom Vertrieb Gm	Wilfried	Klaus jun	2	1001	A&E NAT	A&E Naturstrom Vertrieb Gm	Philipp	Forstner	3	1002	A&E WAS	A&E Wasserkraft GmbH	Einsatz	Fahrzeug	4	1003	ENC	EnerCharge GmbH	Roland	Klaus	5	1004	ENC	EnerCharge GmbH	Manuel	Wilhelmer	6	1005	ENC	EnerCharge GmbH	Jens	Winkler	7	1006	ENC	EnerCharge GmbH	Software	Test

## 4.5 Parameters

The "Parameters" menu item provides information and enables settings for the system, visualization, payment system, notifications and OCPP:

- 1 See section: [4.5.1 on page 18](#)
- 2 See section: [4.5.2 on page 19](#)
- 3 See section: [4.5.3 on page 20](#)
- 4 See section: [4.5.4 on page 21](#)
- 5 See section: [4.5.5 on page 23](#)
- 6 See section: [4.5.6 on page 24](#)

### 4.5.1 System

Shows the current basic settings of the charging system:

- > Station name: Name of the charging station
- > Address line 1/2: Address for the charging station
- > ZIP: Address ZIP code
- > Country: Country of installation
- > Station abbreviation: Short unique identifier for the charging station
- > Serial number: Serial number of the charging station

#### 4.5.1.1 Changing the Station Data

##### Action Steps: Change the Station Data

✓	The extended menu "Parameters" is open.	
1	Click on the menu item „System“.	
2	Click in the respective field and enter the desired station data.	
3	To confirm your changes, click on the „Set“ button for the corresponding line.	
✓	Station data changed successfully.	

## 4.5.2 Visualization

**Shows the current** visualization settings for the charging system:

### General settings:

- > Standard Display language: Set default display language: e.g. *DE = German, EN = English*
- > Standard Payment method: Set default payment method
- > Accept loyalty cards: Define whether the system accepts loyalty cards as payment:  
*Inactive = no/active = yes*
- > Accept Debit/Credit cards: Define whether the system accepts debit/credit cards:  
*Inactive = no/active = yes*
- > Accept App Payment: Define whether the system accepts app payments:  
*Inactive = no/active = yes*
- > Show QR Code: Define whether QR code for live view is displayed during charge:  
*Inactive = no/active = yes*

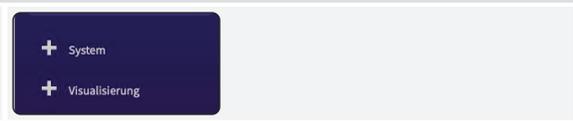

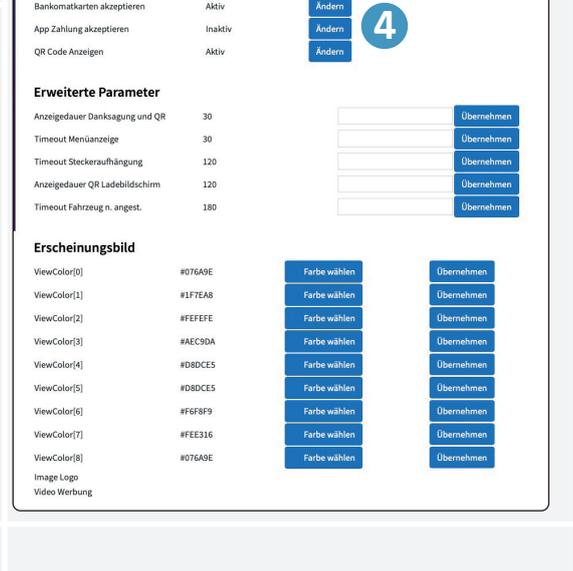

### Advanced Parameters:

Indication of display duration in seconds (e.g.: 180 = 180 seconds)

- > Timeout thank you message and QR: Display time of screen showing thank you message and QR code
- > Timeout user interface: Time until menu activates home screen when inactive
- > Timeout plug not in holder: Display time of information that plug is not correctly in holder
- > Timeout QR code charging view: Display time of information about current charge incl. QR code
- > Timeout car not plugged: Time until menu activates home screen when car is not connected and no activity is registered

### 4.5.2.1 Changing the Visualization

#### Action Steps: Adjust the Visualization

	The extended menu "Parameters" is open.	
1	Click on the menu item „ <b>Visualization</b> “.	
2	Click in the respective field and make the desired changes/adjustments.	
3	To confirm the changes/adjustments click the „ <b>Set</b> “ button in the respective line.	
4	Click on „ <b>Change</b> “ to make any changes to areas of the "General settings".  Additionally, see section <a href="#">„4.5.2 Visualization“ on page 19</a> for more details.	
	Visualization successfully changed.	

### 4.5.3 Lighting

Shows the **current** color settings for the LED system status:

R = Red  
 G = Green,  
 B = Blue  
 \* = *Blinking*

**Basic Settings:**

- > Head LED Status Occupied: LED color set, e.g. B = Blue
- > Head LED Status Charging: LED color set, e.g. B = Blue
- > Head LED Status Service: LED color set, e.g. R\* = *blinking Red*
- > Head LED Status Error: LED color set, e.g. R = Red
- > Head LED Status Available: LED color set, e.g. G = Green
- > Plug LED Status Selection: LED color set, e.g. G\* = *blinking Green*
- > Plug LED Status Occupied: LED color set, e.g. B = Blue
- > Plug LED Status Available: LED color set, e.g. G = Green

- 1 Head LED: left and right
- 2 Plug LED: left and right

#### 4.5.3.1 Changing the Lighting

Action Steps: Changing the Lighting																																		
✓	The extended menu "Parameters" is open.																																	
1	Click on the menu item „Lighting“.	<div style="border: 1px solid black; padding: 5px;"> <p><b>Parameter Beleuchtung</b></p> <p><b>Grundeinstellungen</b></p> <p>R = Rot, G = Grün, B = Blau, * = Blinken</p> <table border="1"> <tr> <td>Kopf LED Status Besetzt</td> <td>BR</td> <td><input type="text"/></td> <td>Übernehmen</td> </tr> <tr> <td>Kopf LED Status Lädt</td> <td>B</td> <td><input type="text"/></td> <td>Übernehmen</td> </tr> <tr> <td>Kopf LED Status Service</td> <td>RG</td> <td><input type="text"/></td> <td>Übernehmen</td> </tr> <tr> <td>Kopf LED Status Störung</td> <td>R</td> <td><input type="text"/></td> <td>Übernehmen</td> </tr> <tr> <td>Kopf LED Status Unbesetzt</td> <td>G</td> <td><input type="text"/></td> <td>Übernehmen</td> </tr> <tr> <td>Stecker LED Status Auswahl</td> <td>G*</td> <td><input type="text"/></td> <td>Übernehmen</td> </tr> <tr> <td>Stecker LED Status Besetzt</td> <td>B</td> <td><input type="text"/></td> <td>Übernehmen</td> </tr> <tr> <td>Stecker LED Status Unbesetzt</td> <td>G</td> <td><input type="text"/></td> <td>Übernehmen</td> </tr> </table> </div>	Kopf LED Status Besetzt	BR	<input type="text"/>	Übernehmen	Kopf LED Status Lädt	B	<input type="text"/>	Übernehmen	Kopf LED Status Service	RG	<input type="text"/>	Übernehmen	Kopf LED Status Störung	R	<input type="text"/>	Übernehmen	Kopf LED Status Unbesetzt	G	<input type="text"/>	Übernehmen	Stecker LED Status Auswahl	G*	<input type="text"/>	Übernehmen	Stecker LED Status Besetzt	B	<input type="text"/>	Übernehmen	Stecker LED Status Unbesetzt	G	<input type="text"/>	Übernehmen

Kopf LED Status Störung	R	<input type="text"/>	Übernehmen																															
Kopf LED Status Unbesetzt	G	<input type="text"/>	Übernehmen																															
Stecker LED Status Auswahl	G*	<input type="text"/>	Übernehmen																															
Stecker LED Status Besetzt	B	<input type="text"/>	Übernehmen																															
Stecker LED Status Unbesetzt	G	<input type="text"/>	Übernehmen																															
2	Click in the respective field and make the desired changes/adjustments.																																	
3	To confirm your changes/adjustments, click the „Set“ button in the respective line.																																	
✔	Lighting successfully changed.																																	

## 4.5.4 Payment Module

**Shows the current** settings for the payment module of the charging system:

### Vendor:

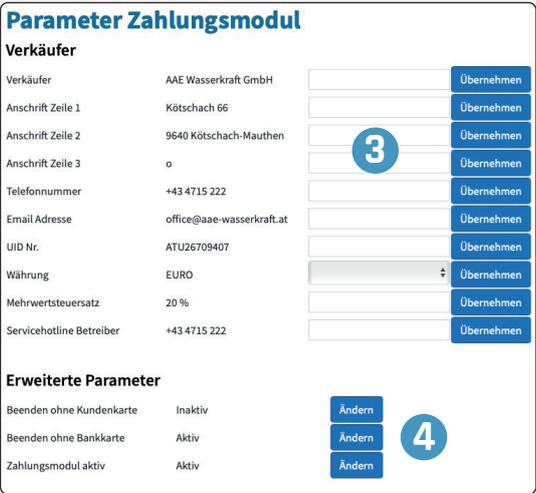

- > Vendor: Company name on invoice
- > Address line 1/2/3: Company address on invoice
- > Telephone number: Company phone number on invoice
- > Email address:: Company e-mail address on invoice
- > VAT No.: Company VAT number for invoice
- > Currency: Set currency for billing and invoice
- > VAT rate: Tax percentage (e.g. 20% = Austria)
- > Operator Service Hotline: Hotline number

### Advanced Parameters:

- > Stop without Loyalty cards: Charging process can be terminated without presenting customer card again: **Inactive = no/active = yes**
- > Stop without Debit/Credit: Charging process can be terminated without presenting bank/credit card again: **Inactive = no/active = yes**
- > Payment module active: Payment module is set to active: **Inactive = no/active = yes**

**Pricing (charge point configuration):** see section [„4.5.4.2 Changing the Pricing Model“](#) on page 22.

### 4.5.4.1 Changing the Vendor Data

Action Steps: Changing the Vendor Data		
✓	The extended menu "Parameters" is open.	
1	Click on the menu item „Payment Module“.	
2	Click in the respective field and make the desired changes/adjustments.	
3	To confirm your changes/adjustments, click the „Set“ button in the respective line.	
4	Click on „Change“ to make changes to the advanced parameters. See also section <a href="#">„4.5.4 Payment Module“</a> on page 21 for a more detailed explanation.	
✓	Vendor data successfully changed.	

## 4.5.4.2 Changing the Pricing Model

**Dieser Bereich** allows setting and adaptation of the price model and tariffs for charge points CP1 and CP2. The following price models are available:

- > **Flat rate:** The charging system charges a flat rate in EUR per charging process. Other factors such as time (minutes) or kilowatt hours (kWh) are not taken into account in flat-rate charging.
- > **Consumption-based 1/2:** Via the integrated power meter, the charging system allows billing per kilowatt hour. The billing amount in EUR per kWh can be freely selected. In addition, a base fee in EUR per minute can be defined. This base fee is charged after a definable time (in minutes).

### Action Steps: Adjust Pricing Models for Charge Points 1 and 2

	The extended menu "Parameters" is open.	
	Click on the menu item „ <b>Payment Module</b> “. Scroll to the "Pricing Model" area	
	Select the desired pricing model for „ <b>CP1</b> “: - Flat Rate - Consumption-based Option 1 - Consumption-based Option 2	
	Select the desired pricing model for „ <b>CP2</b> “: - Flat Rate - Consumption-based Option 1 - Consumption-based Option 2	
	Set the desired values for „ <b>CP1</b> “ and „ <b>CP2</b> “ according to the selected pricing model: - Consumption: - Base Fee: - Base Fee billed after (minutes): - Reservation Amount: or - Flat Rate: - Reservation Amount:	
	Currently set price models and tariffs for „ <b>CP1</b> “ and „ <b>CP2</b> “ are visible in the red marked areas.	

## 4.5.5 Notifications

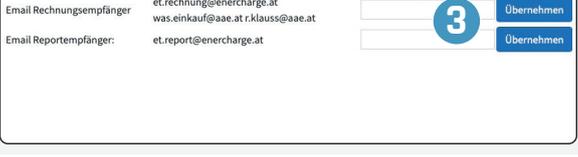

Shows the **current** notification settings:

### General Settings:

- > Send Reports via Email: Reports are sent via e-mail:  
*Inactive = no/active = yes*
- > Send status information via Email: System notifications are sent via e-mail:  
*Inactive = no/active = yes*
- > Send Email errors: Error notifications are sent via e-mail:  
*Inactive = no/active = yes*
- > Send invoices via Email: Invoices are sent via e-mail:  
*Inactive = no/active = yes*
- > Email invoice recipients: E-mail addresses to which invoices are sent  
*xxx.xxx@xxx.xx*
- > Email report recipients: E-mail addresses to which reports are sent  
*xxx.xxx@xxx.xx*

### 4.5.5.1 Changing the Notification Settings

#### Action Steps: Adjusting the Notification Settings

	The extended menu "Parameters" is open.	
1	Click on the menu item „ <b>Notifications</b> “.	
2	Click in the respective field and make the desired changes/adjustments to the e-mail addresses.	
3	To confirm your changes/adjustments, click the „ <b>Set</b> “ button in the respective line.	
4	Click on „ <b>Change</b> “ to make adjustments to the settings.  Siehe also section <a href="#">„4.5.5 Notifications“ on page 23</a> for further explanation.	
	Notification settings successfully changed.	

## 4.5.6 OCPP

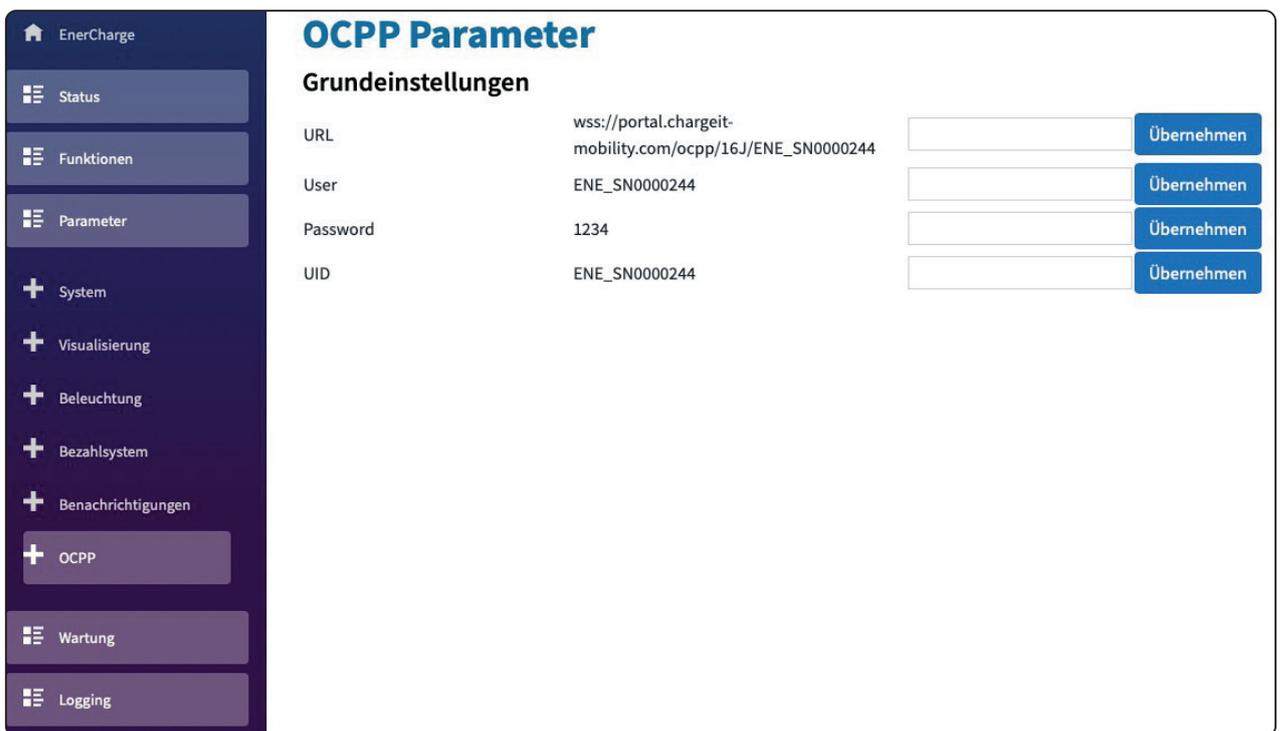

Shows the **current** settings for the OCPP parameters:

**Basic settings:**

- > URL: URL of the OCPP server
- > User: User name of the OCPP account
- > Password: Password for the OCPP account
- > UID: UID number

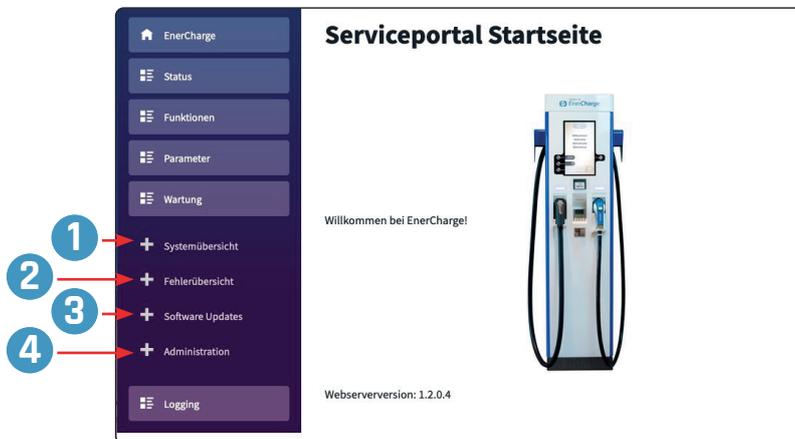

**INFORMATION**

If you wish to change these settings, please contact EnerCharge: see [„5.2 Customer Service“ on page 31](#)

## 4.6 Maintenance

The menu section "Maintenance" shows the following information and provides the following functions:

1 See section: [4.6.1 on page 25](#)

2 See section: [4.6.2.1 on page 27](#)

3 See section: [4.6.3 on page 28](#)

4 See section: [4.6.4 on page 29](#)

### 4.6.1 System Overview

Shows the **current** values and status of the charger, chargecontroller and EC controller:  
See also "[4.6.1.1 System Overview Screen](#)" on page 26"

#### Software Version Charger:

- > actual version: shows the current software version of the charger: *X.X.X.X*
- > software is running: shows whether the software is currently active: *True = yes/False = no*

#### Software Version Chargecontroller:

- > Chargecontroller 1 Software: shows the current software version of the chargecontroller for CP1
- > Chargecontroller 1 Firmware: shows the current firmware version of the chargecontroller for CP1
- > Chargecontroller 2 Software: shows the current software version of the chargecontroller for CP2
- > Chargecontroller 2 Firmware: shows the current firmware version of the chargecontroller for CP2
- > Charging Cable 1: shows the current software version of the charging cable for CP1
- > Charging Cable 2: shows the current software version of the charging cable for CP2

#### Serial Numbers:

- > Serial numbers Charger: shows the serial number of the charger
- > Serial number 2/3/4: shows additional serial numbers 2/3/4 (if applicable)

#### Charger Status:

- > Boot process running: Shows whether boot process is currently active: *True = yes/False = no*
- > Boot process ended: Shows whether boot process is done: *True = yes/False = no*
- > Station "Out of Service": Shows whether the charger is out of service: *True = yes/False = no*

**Charger Errors:**

- > Error 1: shows whether an error is present: **1 =yes/0 = no**
- > Error 2: shows whether a second error is present: **1 =yes/0 = no**
- > Error 3: shows whether a third error is present: **1 =yes/0 = no**
- > Error 4: shows whether a fourth error is present: **1 =yes/0 = no**

**EC Controller Status:**

- > CPU Usage: shows the current CPU usage in percent: **XX %**
- > Memory Usage: shows the memory utilization (RAM) in megabytes: **XX MB**
- > Drive C/D/E Freespace: shows the free capacities of the drives C/D/E in percent: **XX %**
