b. The details of the terminal are shown as below.

4. Remove the knockout

- a. Use the handlebar to remove the knockout and mount the waterproof fittings on the holes. If there are multiple batteries, please remove the knockouts according to actual needs.
- b. Remove the plug as needed and thread the cable through the appropriate plug. The relationship between the plug and the wire diameter is shown in the table below.

Item	Recommended diameter	Wire type
Plug 1-1	3×10 to 5×10 mm ²	Power cable
Plug 1-2	0.25 to 0.75 mm ²	Communication cable
Plug 1+2	5×6 mm ²	Power cable
Plug 1+2+3	5×2.5 to 5×4 mm ²	Power cable
Plug 1+2+3+4	3×2.5 to 3×4 mm ²	Power cable

- c. Tighten the lock nuts of the glands with a torque of 4-5 N·m and the sealing nuts with a torque of 7-7.5 N·m.

NOTE:

- The handlebar should be aligned with the center of the knockout.
- Smooth the edge of the hole with a knife before tighten the nuts and wire the cables.

5. Wire the Cables

5.1 Single battery scenario

Section A. Wire the CAN cable

- Connect the 3m CAN communication cable to the communication terminal as the label in the combiner.
