

SolarEdge Product Waiver Approval

Issue date: March 5, 2024

Dear installer,

Upon examining your waiver request, SolarEdge decided to approve it under the following conditions:

1. This approval is limited to installations done in Europe (including the UK) and the Caribbeans only.
2. The approved design are as follows:
 - a. The connection of P850 Power Optimizers from the below PNs with PV modules up to 470W and with Isc value of up to 15A:
 - i. P850-4RM4MBY
 - ii. P850-4RMXMBY
 - iii. P850-4RMLMBY
 - iv. P850-4RM4MBM
 - v. P850-5RM4MBX
 - vi. P850-5RM4MBY
 - b. This approval is limited for P850 models manufactured in work week 14/2023 or later. The manufacture code is indicated in the Power Optimizer's serial number. Example: S/N SJ1423A-xxxxxxx (work week 14 in 2023).
 - c. For Power Optimizers that were manufactured before that, please refer to waiver number: RFW-002163D from 12/12/2023.
3. The rest of the installation guidelines, Inverter and Power Optimizer's performance remain as stated in the SolarEdge specifications and installation documents.

SolarEdge approves that the design mentioned above, though exceeding the Power Optimizer the rated input DC power (940W vs 850V) and maximum short circuit current per input limit (15A vs. 14.1A), will not void the Power Optimizer or Inverter warranty.

The site must be connected to the SolarEdge monitoring, and site IDs should be reported to waivers_support@solaredge.com within 3 weeks from installation.

Failing to report the site will void this waiver.
